-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1714

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eppele et al in view of Gedon et al.

Eppele et al disclose solvent-based coating compositions suitable for automotive refinishing (abstract, column 1, line 66 and column 8 lines 64-67). These compositions are taught as comprising polyester polyols and acrylic polyols (claim 1) and as suitably cured with polyisocyanates (column 8, line 9). When desired, customary additives and auxiliaries taught as suitable include cellulose acetobutyrate and pigments (column 9, lines 7 and 8).

It would have been obvious to one of ordinary skill in the art to incorporate pigments into the coating compositions of the reference when a color coat was desired. It would further have been obvious to incorporate cellulose acetobutyrate in the amounts claimed instantly when its art known benefits were desired.

Gedon et al is cited as a teaching reference demonstrating that the addition of cellulose acetobutyrate was well known in the art as an additive to coating compositions when improved weather resistance, color fastness and dispersibility, and flow properties were desired.

Regarding instant claims 5 and 6 wherein components A and B are further defined, it is the position of the examiner that applicants claims are drawn to the

admixture of components A-C and, therefore, there is no distinction made by defining what A and B are before mixing as long as the composition meets the content required by the definitions of A and B in claim 1.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (571) 272-1118. The examiner can normally be reached on M-F from 10:00 to 6:00.
